51. 范文

Dear Sir or Madam,

I have heard that an international conference on computer theory and application will be held in Beijing next February. As a senior professor working in the field of computer programming for more than twenty years, I am very much interested in this kind of conference and would like to share my experience and achievements with colleagues and to keep up with the trend of development in this field.

Would you please tell me more about the conference as to the major issues to be discussed, any concrete arrangement for it and the necessary procedures I should follow if I want to attend the conference? I will be very grateful to be informed of all the information and still more honored to receive a formal invitation to the conference.

Yours truly,

Li Ming

52. 范文

From the cartoon given above, we can observe that there is a man digging holes to get water. Having tried four times, he fails to find water and then he gives up halfway. With a cloud of disappointment over his face, He leaves and thinks, “No water here.” However, the fourth hole is very close to water sources, he can make it as long as he persists.

Definitely, the picture let us appreciate the significance of persistence. Why does persistence play such an important role in our life? For one thing, persistence will enable us to achieve our objectives and realize our dreams more rapidly and smoothly. People with persistence are more likely to cultivate a strong will, maintain optimistic in adversities and seize fleeting opportunities. Additionally, Thomas Edison, one of the greatest inventors and entrepreneurs throughout the history of mankind, could be one of the most convincing cases of how persistence works in our daily life. Having experienced thousands of times of unsuccessful attempts when he invented the first electric light lamp, he never ceased trying, but continued to select more materials. Finally, he made it. How could he have succeeded and changed the world without persistence?

Accordingly, at no time should we overlook the power of persistence. Furthermore, when coming across hardships and setbacks, we need to adhere to the faith that our efforts and persistence will pay off. “Great works are performed not by strength, but by persistence.” Benjamin Franklin also once said.
